AMERICA Too much cannot be said of this beautiful dainty pink, tinted lavendar. It is sold by the millions to florists, who use it for cut flowers. The flowers are of immense size and of wax-like texture. 6 cents each.

BARON JOSEF HULOT One of the finest deep violet-blue Gladioli, with well-opened flowers. 6 cents each.

EUROPA A very fine snow-white Gladiolus, of perfect form, with many pure white blooms open at once. The formation is close and compact, making a magnificent spike of wide-open flowers. 15 cents each.

MRS. FRANK PENDLETON, JR. Bright rose-pink on a pure white ground. A giant blotch of richest blood-red on lower petals; as showy as any Orchid. No grander variety in existence. Awarded the highest honors of the American Gladiolus Society. Always a prize-winner. 15 cents each.

MRS. FRANCIS KING The most beautiful "Bespard shade" of flame-pink, immense flowers on a spike growing four feet high, with from eighteen to twenty flowers, six to eight of which are open at one time; a magnificent variety. 6 cents each.

PEACE A grand white flower with delicate lilac feathering in the throat of two of the petals; flowers correctly placed on a tall, graceful spike. 10 cents each.

RUFFLED GLORY Each petal is exquisitely ruffled or fluted. Beautiful creamy-apricot with delicate tint of pink and fine markings of bright red on lower petals. It has received many certificates and awards. I give this first place. 10 cents each.

WAR Deep blood-red, shaded crimson-black; very tall and conspicuous. This is probably the best Gladiolus of this beautiful shade of red. Try it. 10 cents each.

No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It lasts longer cut than any Dahlia 1 know. 35 cents.

THE CREAM OF THE NEW ROSES

I here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Ireland, Italy, Holland and America can produce.

PRICE, 25 CENTS EACH, EXCEPT WHERE NOTED. TWO-YEAR PLANTS, 50 CENTS, EXCEPT WHERE NOTED.

AUTUMN TINTS (H. T.)—Coppery-red shaded with orange and salmon; flowers produced in great profusion. A most interesting and attractive garden Rose. Similar in color to Miss. Edward Herriott. Very lovely.

CHAMP WEILAND (H. T.)—This is the new Killarney, said to be a great improvement.

COLUMBIA (H. T.)—It is a big Rose, the open flower measuring six inches across. The color is a true pink, about the shade of a perfect shawyer, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring. 35 cents; 2-year plants, 60 cents.

COUNTESS CLANWILLIAM (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, bright-centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY (H. T.)—This is the Crimson Chatenay, a great Rose. All know the Miss. Abel Chatenay. Well, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety-crimson. A grand garden Rose, as it is always in bloom.

EDGAR M. BURNETT (H. T.)—Very large, full flowers of fine shape and form, with large flesh petals tinted rose. Said to be a great improvement of La Fiancee, Chatenay, regarded as an advance on the type of Lady Alice de Hungerley; undoubtedly the sweetest scented Rose in existence. As a garden Rose unequalled.

ETINCELANCE (H. T.)—Bright brilliant red, shaded with crimson, large, full and of fine form, opening into an enormous bouquet of fragrance; bud elongated, of brilliant velvety crimson color. Free flowering. Extra fine.

FLORENCE FORRESTER (H. T.)—Clear snow-white with a lemon tinge. As the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. I consider this Rose the grandest of all whites for bedding. For size and substance there is no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star-Spangled Banner," and also that it should hail from Baltimore, one of whose committees for producing new Roses was formed by inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Good for the garden.

G. AMEDEE HAMMOND (H. T.)—The color is cadmium or deep apricot egg-yolk, shading off to fawn or delicate buff. Blooms large, full, perfectly formed; very floriferous and very fragrant. A great acquisition and a Rose I set great store on.

GLOIRE DES BELGES (H. T.)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower. 25 cents; 2-year plants, 60 cents.

GORGEOUS (H. T.)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish copper, the most charming and gorgeous coloring which has yet been produced. It is the most striking Rose in existence. Gold medal N. R. S.

HADLEY (H. T.)—In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The flower is double and buds are also formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HARRY KIRK (T.)—A splendid Rose, of most robust growth, with free-branching habit, flowering freely and continuously; the blooms are large, with large, smooth petals of great substance; the form is perfect, the buds long and elegant. Color, deep sulphur-yellow, passing to a lighter shade at the edges of the petals. Awarded a gold medal by the National Rose Society of England. This Rose is difficult to propagate and will always be for this reason, remain high in price, although when once rooted and established, is a good grower. 35 cents; 2-year plants, 60 cents.

HORAN TAFT (H. T.)—A rich cerise-pink. Flower very large. A free bloomer and will become as famous as a bedding Rose as is the variety President Taft. Growth very strong. Keep your eye on this variety.

HENRIETTE (H. T.)—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery-orange and changing to soft coral-salmon. Very hardy. Fine in batch.

H. F. EILERS (H. T.)—Outer petals carmine-rose; center carmine and slate blue-red. Buds very long and pointed; flowers large and full, with high center.
THE CREAM OF THE NEW ROSES—Continued

MADAME BARDOU JOE (H. T.)—Chrome-yellow and canary citron-yellow, large, full and cupped form. Very free flowering and very distinct.

MADAME COLLETE MARTINET (H. T.)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one. 35 cents; 2-year plants, 60 cents.

MADAME MARCEL DELANNEY (H. T.)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold medal of the Bagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hyrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous. 35 cents; 2-year plants, 60 cents.

MADAME THEODORE DELACOURT (H. T.)—Reddish-salmon shaded clear yellow; large flowers of globular form; a rare color.

MARGARET DICKSON HAMIL (H. T.)—A magnificent Rose. Its delicate solid maize-straw color with delicate carmine on back of petals makes it an outstanding Rose. Gold medal, N. R. S.

MELANIE NIEDIECK (H. T.)—Flowers large and full, opening easily in all weathers. Color fine lemon-yellow. Growth vigorous, flowering continuously during the season. A fine garden Rose.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphur-cream, with the faintest blush towards the edges. In shape and form this Rose is a model of perfection; every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S. 35 cents; 2-year plants, 60 cents.

**HOOSIER BEAUTY (H. T.)**—I use description of E. G. Hill Co. "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Rich mond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance.

**IMOGEN (H. T.)**—Orange-yellow in center, shading towards the edge of petals to pale yellow and cream-white.

**LADY GREENALL (H. T.)**—Intense saffron-orange, heavily zoned and overspread on deep creamy-white, reflex of petals faintly suffused delicate shell-pink; a truly magnificent Rose.

**LADY PLYMOUTH (T.)**—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England, and silver medal at Crystal Palace Show, London.

**LOS ANGELES (H. T.)**—Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever-increasing wealth of color is maintained from the incipient bud until the last petal drops. 35 cents; 2-year plants, 60 cents.

**LILLIAN MOORE (H. T.)**—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar Trophy offered by the "Pan ama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow with slightly deeper center; long buds; free bloomer. A gem. 35 cents; 2-year plants, 60 cents.

MADAME MARCEL DELANNEY

Madame Marcel Delanney
THE CREAM OF THE NEW ROSES—Continued

MRS. CHARLES RUSSELL (H. T.)—This wonderful new American Rose has taken the country by storm. No other forcing Rose except "American beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand rosy-pink blooms of the largest size and build. 35 cents; 2-year plants, 60 cents.

MRS. CAMPBELL HALL (Tea) — Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral-fawn. Very deliciously fragrant. Awarded gold medal, N. R. S. 35 cents; 2-year plants, 60 cents.

MRS. HENRY WINNETT (H. T.)—This is a seedling raised by John H. Dunlop, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest old or crimson varieties. The buds are long and well formed. A superb red Rose. 35 cents; 2-year plants, 60 cents.

MRS. MACKELLAR (H. T.)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MRS. HUGH DICKSON (H. T.)—A grand Rose for any purpose. Deep cream with a heavy suffusion of orange and apricot, delightful perfume, one of the most beautiful and useful Roses. S. G. medal, N. R. S.

MRS. S. T. WRIGHT (Tea)—A delightful Rose, a sport from that prime favorite, "Harry Kirk." The guard petals are delicate cadmium old gold; the center petals have a delicate and charming suffusion of delightful, pure rose-pink on orange-chrome.

NATIONAL EMBLEM (H. T.)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely.

NERISSA (H. T.)—This Rose was given an award of merit from the Royal Horticultural Society of England. Why they did not give it a gold medal is beyond my ken. An enormous large, full flower, of fine shape, making a magnificent effect in the garden. Growth vigorous. This is a great Rose.

OLD GOLD (H. T.)—Vivid reddish-orange with rich coppery-red and apricot shadings. A true old gold color which is a unique color amongst Roses. A continuous free Bloomer. Very sweetly fragrant. Gold medal, National Rose Society.

QUEEN MARY (H. T.)—A uniquely beautiful Rose which enthuses the heart of all who see it and ever holds them in its lovely sway. Its pure, rich colorings, which are zoned deep, bright canary-yellow, on plenteous well-shaped petals which are crayoned with pure deep carmine. This extra touch of color gives a gloriously warm effect as the yellow and carmine do not commingle; the petals are arranged in tip-tilted globular formation. It is most floriferous and fragrantly primrose-tea perfumed. Awarded silver cup, Festival of the Empire, Crystal Palace, London, and silver-gilt medal, N. R. S.

White American Beauty

MRS. SARAH YEATS (H. T.)—The color is a new and brilliant red. The petals are very large for a Rose and of splendid texture. Mrs. Sarah Yeats is not an experimental Rose, but one that has been successfully produced under ordinary greenhouse conditions. Stems run eighteen to forty-two inches long without pinching. It holds up longer after being cut than any of the red Roses.

MRS. HUGH DICKSON (H. T.)—A grand Rose for any purpose. Deep cream with a heavy suffusion of orange and apricot, delightful perfume, one of the most beautiful and useful Roses. S. G. medal, N. R. S.

THE "EXCELSIOR" LIST OF EVER-BLOOMING ROSES
New and Choice for Outdoor Planting or House Culture

Price, 15 cents each; any four of your own selection for 50 cents; any nine for $1.00. If you leave the selection of the varieties to me, I will send five for 50 cents, or ten for $1.00. Large 2-year-old Roses from this list, 40 cents each, or three for $1.10.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as Fl. by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of 1-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Any one can succeed with them.

NEW VARIETIES OF TENDER CLIMBING ROSES

ALL OF THESE NEW CLIMBING ROSES IN 2-YEAR-OLD PLANTS, 60 CENTS EACH.

CLIMBING ETOILE DE FRANCE (C. H. T.)—This Rose is identical in every respect with Etoile de France, save that it is a rampant climber, making it one of the very best dark, velvety-crimson Climbing Roses. 20 cents each.

CLIMBING LADY ASHTOWN—This is a wonderful Rose in many ways, producing not only an immense crop of its very large soft rose-colored flowers in June, but continuing to bloom almost without interruption until the end of the season. A new Rose. 25 cents.

NEW POLYANTHA, OR BABY RAMBLER ROSES

PRICE, 20 CENTS EACH; 2-YEAR-OLD PLANTS, 40 CENTS.

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom. Prolific.

BABY QUEEN OF COLORS—This is a new Baby Rose bearing flowers that in color are the same as Farbenkonigin or Queen of Colors. Clear pink.

BABY THOUSAND BEAUTIES—Its flowers are large, buffer, and more like Thousand Beauties that it has been rechristened Baby Thousand Beauties. It is a bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, being firm white, delicately flushed pink, changing to deep rose-carmine. A splendid Rose. Try it.

CLARA STAHL—A fine pink Polyantha that is a winner. You know there is not an over-supply of good pink Polyanthas. Well, here is one that will surprise you. Try it. Bright pink.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all its type, it is free growing, and will form a bush in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GREETING OF AACHEN—Yellowish-red colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. One of the very best of its kind. New and distinctly different from existing varieties. It is free of growth, large, glossy foliage and its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

ORLEANS—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; flowers not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. I believe that they will outlast almost any other Rose in existence with their stiff papery-like texture. This pretty Rose has taken Europe by storm and is making a sensation in this country. Awarded gold medal.

ROSarie, OR PINK THOUSAND BEAUTIES—This is a bright pink form of that famous Rose, "Thousand Beauties." A grand Rose from any standpoint.

TIP TOP ("Baby Doll")—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll roses. A bunch of "Baby Doll" being an even parterre of delicious color.

POLYANTHA, OR BABY RAMBLER ROSES

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let me tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful, either pot-grown or for bedding purposes or for hedge effect.

PRICE, 15 CENTS EACH; FOUR FOR 50 CENTS; 2-YEAR-OLD PLANTS, 40 CENTS EACH; THREE FOR $1.00.

ANNA MULLER—The pink Baby Rambler; always in bloom.

BABY RAMBLER—Completely hides itself in summer; bright red; vigorous.

CATHERINE ZEimet—The White Baby Rambler; extra.

ELLEN POULSON—Dark brilliant pink; fragrant.

ERNA TESCHENDORFF—Deep crimson, flushed with Carmine; very dark.

JESSIE—Bright cherry-crimson; superb.

LE PONCEAU—Dark red in large clusters.

MADEMOISELLE CECILE BRUNNER—This is the popular Baby Pink Rose. In the past year two this Rose has fairly jumped into popularity. It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in bunches of three to five flowers, and combines in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in winter it can be a money-maker, both outdoors and under glass. Bud and flower are both handsome. Color bluish, shaded light salmon-pink; distinct and desirable.

MARIE PAVIE—Ellegant white, flushed with pink.

MRS. WM. H. CUTBUSH—Flowers the delicate pink of Dorothy Perkins.

PERLE D'OR—Coppery-orange, changing to fawn.
"FAMOUS" ROSE COLLECTION FOR GARDEN PLANTING

We guarantee that no better Twelve Roses for the garden were ever offered than this "Famous" Collection. Try them.

PRICE, 15 CENTS EACH; ANY FOUR FOR 50 CENTS; THE ENTIRE TWELVE FOR $1.20; 2-YEAR-OLD PLANTS, 35 CENTS EACH; ANY FIVE FOR $1.50; THE ENTIRE TWELVE FOR $3.50.

ANTOINE RIVOIRE—This is the famous Mrs. Taft Rose of the fashionable Eastern markets. This Rose is in a class by itself; no Rose ever produced has such substance of petal; color creamy-white, with rainbow tints; a beauty and a wonder.

BESSIE BROWN—A Rose of translucent beauty, of the largest size; color pearl-white, with a delicate tinted pink.

EMPERESS—A grand white garden Rose that has stood the test of time; full and double; fine buds and flowers.

ETOILE DE FRANCE—For the best red garden Rose it lies between this one, Rhea Reid and Helen Gould. Some say one and some the other.

ETOILE DE LYON—Still the best large golden-yellow Rose.

HELEN GOOD (The Beauty Cochet)—What the introducers say: "This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying $1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow, suffused with pink, each petal edged deeper, more chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out."

HELEN GOULD—A rich red Rose that is a great bloomer; the shade of red has been described best as a watermelon-red; elegant.

LA FRANCE—This is claimed by many to be the queen of all the Roses; bright silvery-pink.

MAMAN COCHET (The Queen of All Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose I know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As I see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.

SOUVENIR DE PRES. CARNOT—A Grand Rose of the largest size; the color a delicate fawn or salmon; extra fine.

WHITE MAMAN COCHET (No Finer Rose Than This)—This Rose attracted my attention from the very first time I ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, round, and very durable. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in immense size of its buds and flowers. Indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeannette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

"GIANT" COLLECTION OF TWO-YEAR-OLD ROSES

FOR IMMEDIATE EFFECT

These large Roses have become so popular among my customers that I devote a great deal of room to them, growing them in constantly increasing number. This season I have a heavy stock and offer many thousand bushes at the very low figures given. I can usually furnish all the varieties enumerated in the catalogue. These bushes are two years old, strong and healthy. They make, of course, more of an appearance from the first than does the smaller stock, having practically a year the advantage in all respects—an advantage for which I find many persons willing to incur the additional expense. I advise all of my friends to order at least a part of their Roses in this large 2-year-old size. Plant them this fall.

It is an extraordinarily strong grower, and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. AMERICAN PILLAR—A single flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of wild rose, blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches. They last in perfect bloom a long time, and are followed by brilliant red hips of berries, which are carried late into the fall. 25 cents; 2-year plants, 50 cents.

BLUE ROSE—This is a Rambler, and will thrive anywhere, being perfectly hardy. It has created a great stir in the Rose world, for the talk of a Blue Rose has been going on since time immemorial. It first opens a pink color, quickly changing to a decided violet-blue. When the plant is in full bloom it presents a startling effect. 15 cents; two for 25 cents; 2-year plants, 40 cents.

CHRISTINE WRIGHT, or PINK CLIMBING AMERICAN BEAUTY—This is identical with the Red Climbing American Beauty described next below this variety; flowers four inches in diameter; color bright, clear pink; immense. Try it. 20 cents; 2-year plants, 50 cents.

CLIMBING AMERICAN BEAUTY—Color red, with touches of crimson, and intensely fragrant. 20 cents; 2-year plants, 40 cents.

GARDENIA (The Hardy Marechal Niell)—This grand Rose has proven itself hardy in Virginia and Tennessee. It is a deep golden-yellow of the largest size. 50 cents; 2-year plants, $1.00.

GEISHA—Brilliant scarlet-crimson. The long shoots are completely covered with bloom the entire length. A wonderfully pretty Rose. 50 cents.

GOLDFINCH—This is the yellow-flowering "Thousand Beauties. All know the good qualities of that superb variety. Well, this is a yellow form, and is attracting much attention and many favorable comments. 20 cents; 2-year plants, 50 cents.

LE MEXIQUE—Delicate silvery-rose, turning to rosy-white, reverse of petals light rose. Large for its class. Flowers full, opening well, produced in clusters. Continuous and perpetual flowering. 20 cents; 2-year plants, 50 cents.

PAUL'S SCARLET RUNNER—Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful new Climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit. 25 cents; 2-year plants, 50 cents.

REICHES IN THOUSAND PERKINS, or EXCELSA—It is a good deal to claim for a Rose, but I am within bounds when I describe Excelsa as a brilliant Crimson Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimson Rambler are its unsightly foliage in unreasonable weather, and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is never green, and this will assure this lovely crimson with a scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. This flower is very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals wand with scarlet. 25 cents; 2-year plants, 50 cents.

SHOWER OF GOLD—Produces masses of flowers in large clusters. Color deep golden-yellow, with orange shadings in the center. Numerous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the long felt desire for a hardy yellow climbing Rose. 25 cents; 2-year plants, 50 cents.

SILVER MOON—Flowers very large, four and one-half inches and over in diameter. Pure white in color, petal substance, beautifully cupped, forming a clomatitis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. Flowers borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. 25 cents; 2-year plants, 50 cents.

SOURCERESS—One of the most beautiful varieties. Large for its class. Full flowers. Color deep golden-yellow. A great acquisition, producing large panicles of flowers. A decided beauty. 25 cents; 2-year plants, 50 cents.

SWEET LAVENDER—Bright pale mauve or lavender, with golden stamens. Most distinct. Dense, dark green foliage and many large bunches of flowers. Very vigorous. 25 cents; 2-year plants, 50 cents.

THOUSAND BEAUTIES—Flowers upon first opening are the most delicate shade of pink ever seen in a Rose; might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in color. This Rose is sweeping the country like a prairie fire. Very popular. 20 cents; 2-year plants, 50 cents.

WICHMOSS, or CLIMBING MOSS—This is a wonderful break in Roses, being a cross between the "Wichuraiana" and "Moss Rose." It has retained the scented habit of the "Wichuraiana," making long growths five to eight feet in length, with the glazed resistant foliage, while the bud is heavily mossed in bright green and has the peculiar aromatic odor of the Moss family. Flowers borne in clusters that are daybreak-pink in color, opening into bloom that is a good semi-double in fullness. A climbing Moss that is a wonder; hardy, 35 cents; 2-year plants, 75 cents.

Dear Miss Good,:

The Rose plants ordered of you came this morning, and although the mercury here was at 25 degrees, they are as bright as new-blown daisies. I am pleased with your seed, and thank you for such vigorous plants. Wishing you much success and that your business may thrive, war or no war. I remain,

MARY C. DOUGLAS, Texas.
MOSS ROSES

These are probably a sport of the Cabbage Rose. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance? Perfectly hardy.

**PRICE, 25 CENTS EACH; THE FOUR FOR 80 CENTS; 2-YEAR-OLD PLANTS, 50 CENTS EACH; THE FOUR FOR $1.75.**

ELIZABETH ROWE—This is an old favorite, with its large deep pink buds well mossed. A beauty.

HENRI MARTIN—Large, full flower of deep red, well mossed; fragrant.

MOUSSELINE—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE—Deep blush-pink, with buds that are thoroughly mossed.

PERNETIANA ROSES OR AUSTRIAN BRIAR

A new family of Roses; native of the south of Europe. The varieties I offer are new, and were introduced by the great French rosarian, Pernet Ducher, and Wm. Paul & Son, of England. They resist the coldest weather and produce flowers in the greatest abundance, with strange colors not to be found in any other section of Roses.

ARTHUR R. GOODWIN—This is a genuine "Pernetiana," and is perfectly hardy everywhere. The color is coppery orange-red, passing to salmon-pink as the flowers expand. A superb combination of color; flowers medium to large and full. Should prove a most valuable Rose. As this variety grows from cuttings, I offer it on its own roots. 20 cents; 2-year plants, 50 cents.

MADAME EDWARD HERRIOTT—"The Daily Mail Rose." Winner of the gold cup which was offered by the London Daily Mail for the best new Rose exhibited at the International Horticultural Exhibition held in London, England, May, 1912 (this was the greatest horticultural exhibition ever held), and to be known as the Daily Mail Rose. In competition with the world's greatest rosarians this much-coveted prize was awarded to M. Pernet Ducher for this wonderful novelty. It was again exhibited in London on May 1, 1913, at the exhibition of the National Rose Society of England, where it was awarded the Society's gold medal. M. Pernet Ducher describes its color as follows: "Buds coral-red, shaded with yellow at the base; the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rose-scarlet passing to a shrimp-red." One of our American correspondents, a friend of the introducer, who had the pleasure of testing it in this country, says: "A wonderful Rose. The bud is long, slender and pointed, the color is like sunshine on a copper-red metal." 25 cents; 2-year plants, 50 cents.

VISCONT ENFIELD—Coppery old rose, shaded with yellow. The inner petals are deeply tinted with carmine, while the center ones are sometimes striped with yellow. Flowers large, full, elongated; very floriferous. 20 cents; 2-year plants, 50 cents.

Abelia Rupestris Grandiflora

This is a fine glaucous foliaged shrub of elegant growth. It is hardy south of the Ohio; bears large racemes of bell-shaped white flowers that are deliciously fragrant. A noted southern landscape gardener says this is the best of all shrubs for the South. Blooms all summer and makes a shapely plant. Altogether a wonderful shrub. 15 cents each; larger plants, 25 cents.
SPLENDID PEONIES—HARDY EVERYWHERE

“ARISTOCRAT OF FLOWERS”

The wonderful improvement made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of my Peonies, and see what grand flowers they are. Only one fourth of the flowers found that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit my field will say, “I have Pink and White Peonies. I desire only Red ones,” but when they are shown the Pink and White, they invariably explain, “How grand! I have none like them.” There is as much difference in Peonies as there is in Roses.

SPECIAL COLLECTIONS OF PEONIES

To those who do not care for the nomenclature of the Peony, I have made up several collections, and here offer them as an aid to making selections. Patrons will find these varieties embrace a wide range of color and form, and are exceptionally meritorious.

Size of Roots

The size of Roots offered in this catalogue are divisions of two to five eyes. I cannot supply in any other sizes in the spring time. I would ask that my patrons order by number as well as by name, to avoid mistakes.
THE CREAM OF THE PEONIES

You may order by the number preceding the varieties or by name, or, better still, in order use both number and name. For full and complete description of these Peonies send for my booklet, "Peonies for Pleasure." It is mailed free. It also describes and prices all other choice kinds. If you want information on the plant you desire, I will be glad to apply; planting time and how to plant; varieties for cut flowers; how to grow exhibition flowers. This book describes over two hundred of the choicest blooms. It stands next to the Rose in beauty, that is, practically known to the amateur as simply a red, white and pink Peony, then send today for "Peonies for Pleasure."

TREPEONIES

This is a remarkable species, developed from Peony Mouton, a native of China and Japan. In habit of growth it is not unlike a deciduous shrub—the growths are short and stocky, the plant eventually forming a small clump. In the course of circumspection; the foliage is quite handsome, and the immense flowers, which usually appear some two weeks ahead of the herbaceous class, are most remarkable for their immense size and gorgeous colorings. Splendid for grouping or for specimen plants on lawns. They are a hardy plant, it being possible to give some attention in very cold latitudes. All shoots springing from the base should be rubbed off. I offer any color desired, my choice of varieties only, 5-year-old plants, at $1.50 each.

REMEMBER That so long as I can ship Peonies safely during the spring months I will do so; after it becomes too late I will file your order for them and ship in the fall.
**BEAUTIFUL HOUSE FERNS**

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Every one of these Nephrolepis Ferns is entirely distinct in every way. That I am head-quarters for Ferns is evidenced by the choice assortment that I offer. No other firm offers so many distinct and choice varieties. Try me for Ferns.

**The “Roosevelt Fern”**

*Nephrolepis Roosevelt*

It is my good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the Boston and the Boston Fern, but it will sweep that Fern from the boards for two reasons: It produces many more fronds than the Boston, thus making this bushier, handsomer plant; then the pinnae are beautifully undulated, giving the “Roosevelt” a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. Fine young plants, 20 cents each; strong plants, 65 cents each.

**The “Teddy Junior Fern”**

*Nephrolepis Teddy Junior*

“Teddy Junior,” the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shape-ly, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. “Teddy Junior” will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. Fine young plants, 20 cents; strong plants, 50 cents.

**The “Crested Fern”**

*Nephrolepis Scholzeli*

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow. The smallest salable plants express the type, and in every size are models of beauty for table decorations. Fine young plants, 20 cents; large plants, 50 cents.

**The “Ostrich Plume Fern”**

*Nephrolepis Whitmanii*

A great Fern. In fact, it is a plant that appeals to every one, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Every one who has ever seen it is charmed with it. As some one has expressed it, “There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. I consider it the most valuable novelty that has been introduced in many, many years.” It has taken gold medals wherever shown. Fine young plants, 25 cents; strong plants, 66 cents.

**The “Big Four Fern”**

*Nephrolepis Splendida*

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a “Boston,” the wavy effect of a “Roosevelt,” the fluffy effect of an “Ostrich Plume,” and the uniqueness of a “Fish Tail.” Some fronds will be straight Boston, others will be true “Roosevelt,” in others the ends of the pinnae will be the feathery “Ostrich Plume,” while in others the ends of the pinnae will be the genuine “Fish Tail.” Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of “Big Four Fern.” Every one who sees it goes “daffy” about it. This is without question the most splendid of all the Nephrolepis. Be sure to try it. Fine young plants, 20 cents; strong plants, 50 cents.

**The “Philadelphia Lace Fern”**

*Nephrolepis Elegansissima*

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the plant fronds the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. Fine young plants, 20 cents; strong plants, 50 cents.

**The “Wannamaker Fern”**

*Nephrolepis John Wannamaker*

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzeli, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. Fine young plants, 20 cents; strong plants, 75 cents.

**The “Newport Fern”**

*Nephrolepis Scotti*

Of such dwarf habit and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. Fine young plants, 20 cents; strong plants, 50 cents.

**The “Old Original Sword Fern”**

*Nephrolepis Exaltata*

This is the “old original Sword Fern,” the “daddy” of them all; the one plant from which all the Nephrolepis I offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is mostly largely used as a centerpiece in vases than are any of its descendants. Fine young plants, 20 cents; strong plants, 50 cents.
BEAUTIFUL HOUSE FERNS—Concluded

The “Gold Medal Fern”
Nephrolepis Piersonii
This Fern received a gold medal from the Society of American Florists and Ornamental Horticulturists, and is the only gold medal ever awarded by them for any plant whatsoever. An entirely new form of the Boston Fern. The pinnae subdivide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed into one, giving the plant a graceful, feathery and plummy effect. Fine young plants, 20 cents; strong plants, 50 cents.

The “Fluffy Ruffles Fern”
Nephrolepis Superbissima
This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and the irregular shaped fronds, which give it the name of “Fluffy Ruffles Fern.” The fronds are very heavily imbricated, the pinnae overlapping, and so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Fine young plants, 35 cents; strong plants, 75 cents.

The “Parlor Fern”
Nephrolepis Whitmanii Compacta
This is a condensed form of the “Ostrich Plume” Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. Fine young plants, 20 cents; strong plants, 50 cents.

Dwarf Ferns for Fern Dishes
I have selected a few of the hardiest and most satisfactory varieties for filling Fern Dishes, than which there is no prettier table decoration for winter. Price, 12 cents each; or five distinct Dwarf Ferns for 50 cents.

The “Fish Tail Fern”
Nephrolepis Davalliioides Furcans
This is a grand Fern entirely distinct from any of the other varieties of Nephrolepis. Throughout the South and especially at New Orleans this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plan of any of the Nephrolepis. Grand for house culture. Fine young plants, 25 cents; strong plants, 75 cents.

The “Boston Fern”
Nephrolepis Bostoniensis
In the vicinity of Boston no other plant is so extensively used as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable.

The “Baby’s Breath Fern”
Nephrolepis Goodii
This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, “Call it the Baby’s Breath Fern, as it is so dainty in texture that a baby’s breath would set its fluffy foliage in motion.” The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety and the best of its type. Nothing is daintier or more exquisite than well-grown specimens in any size. My reputation for it that no Fern in existence can compare with “Baby’s Breath” in fluffiness. Fine young plants, 25 cents; strong plants, 65 cents.

Special Offer
The Fifteen Beautiful Ferns as named, costing $3.30, for only $2.75. The Fifteen Ferns in strong plants, costing $4.45, for only $7.75.

Pansy Geranium, Mrs. Layal

A Wonderful Plant

This new and wonderful Pansy Geranium is of the easiest growth, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivaling the Pansy in uniqueness of flowers. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Strong plants, ready to bloom, 25 cents each; two for 40 cents.
PELARGONIUM, OR LADY WASHINGTON GERANIUMS

The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. I here offer eleven distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the handsomest of all flowers—once seen, never forgotten.

THE EASTER GREETING OR EVER-BLOOMING SET

35 CENTS EACH; ANY THREE FOR $1.00; ANY SIX FOR $1.75. THE SET OF ELEVEN FOR $3.00.

EASTER GREETING—Planted out as a bedding plant, is will bloom continually until late in the fall. It will prove the forerunner of a new race of ever-blooming kinds, as it rivals the Orchids in beauty. This new species is the earliest of all Pelargoniurns, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. Florets fiery amaranth-red, with five large, regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer.

GARDENER'S JOY—The ground color is apple-blossom pink, the two upper petals have blotches of carmine down, the lower are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and re-mind one of the Rhododendron cluster. It is of a half-dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable marigold.

GLORY—This splendid novelty is quite remon tant, florets and cluster very large; ground color, Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniurns. This kind has a very robust growth.

KING OF SPAIN—Reddish-purple; fine bold flower of grand form; lighter center; good constitution; very showy.

LORD MAYOR TRELOAR—Bright rosy-red with a very effective maroon blotch on the upper petals; edge of petals lighter color, center of flower white.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

MADAME THIBAUT (The New Double Pink)—The flowers are three inches in diameter, perfectly double, with the brightest pure pink, beautifully ruffled edges; very free in bloom.

MADAME VIBERT—Blackish-maroon, bordered fiery-red, each petal edged with deep magenta.

MRS. ROBERT SANDIFORD (The New Double White)—Flowers are three inches across, of the purest snow-white and perfectly double and very free in bloom. You cannot imagine anything prettier.

PRINCE—Immensely large flowers, strongly crim ped, of fine shade, with from six to ten petals; color rich purple with velvety-black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

TOMMY DODD—Immensely showy trusses; lower petals soft blush, upper petals maroon and crimson.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, makes them especially valuable for garden decoration. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

BEAUTIFUL CANNAS

Cannas are called the poor man’s Orchid because one may possess a perfect riot of color in his yard or garden for the minimum of both outlay and labor. They grow rapidly and bloom luxuriantly throughout a long season, requiring merely ordinary hoeing and weeding, and they always respond to plenty of water. Soak the ground thoroughly. Planted in beds of any formal shape, in rows or in front of porches and foundation walls, their rich, tropical foliage and gaudy bloom will repay their care and the insignificant trouble of winter storage.

CARNATION PINKS—The Divine Flower

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground or in pots quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don't buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep in a temperature of forty to fifty degrees at night, and the plant will yield a fragrant number of flowers with splendid stems, as fine as those sold by florists. If not pinched in they will bloom profusely during the summer. I offer the finest varieties in existence. Your order is incomplete without some Carnations.

These beautiful varieties are again very popular for outdoor bedding purposes. They are quite hardy, and with but a slight covering of leaves or coarse stable litter during the winter, will take care of themselves after once planted, and produce an abundant, almost lavish, profusion of bloom; and the plants lend a coloration to the garden just at a time when other plants have been destroyed by frost and are looking their worst.
Frost does not materially affect the flowering, and it will frequently happen that an armful of flowers can be cut after a sharp frost.

The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTESS OF LONSDALE—For perfection of bloom, erectness of stem, abundance of flower, this variety has no equal. Beautiful! On several of the plants I have counted over 150 perfect blooms on one plant. Is there any other garden flower that can equal it? The color is a rich salmon-pink, tinted apricot.

FLORADORA—Deep dark, rich wine-crimson, splendid shaped flowers on long, upright, wiry stems.

HENRI CAVEAUX—Old gold shading to orange-yellow, a glorious sort.

J. H. JACKSON—This is without doubt the finest dark Cactus Dahlia. Its velvety-black crimson-maroon shade is very striking. Large and perfect.

KRIEMHILDE—A most popular cut-flower variety. Color brilliant pink, shading to white in the center.

PRINCE OF YELLOWS—One of the best canary-yellow for cut flowers.

QUEEN OF HEARTS—(New.) The best white Cactus ever introduced. Pure white, shading to lemon-yellow at base of petals; very free bloomer.

REINE DE LONSDALE—Brilliant Geranium-red; early and free; a great favorite.

SPRINGFIELD—A new Dahlia of my own introduction. It is identical with Countess of Lonsdale, except in two essentials. It has a darker stem and the flowers instead of being a salmon-pink, as in Lonsdale, in Springfield are a rich amaranthine-red. Its beauty cannot be described. No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It lasts longer cut than any Dahlia I know.

DECORATIVE DAHLIAS

These come next to the Cactus as a cut flower. They are also very showy in the garden, being unusually free bloomers. They are more formal in make-up than the Cactus Dahlias, but not so formal as the Show varieties, being a happy medium between the two. Except where noted, 25 cents each; three for 60 cents; the entire set of thirteen decorative Dahlias, costing $3.35, for $2.75.

BLACK BEAUTY—Deep velvety-maron. The blackest of all Dahlias.

HORTULANUS PETIT—(New.) Salmon-pink, yellowish center; as large as Souv. de C. Doazon. Has taken many first prizes. 50 cents.

HORTULANUS WITTE—(New.) Pure snow-white; elegant.

JACK ROSE—A magnificent flower with perfect form. Color rich crimson-red, with maroon shadings. Named for its counterpart among Roses, the famous "General Jack."

JEANNE CHARMET—A charming cut-flower variety of a pleasing shade of delicate violet-rose on a lighter ground. A glorious flower.

MADAME A. LUMIERE—Around color white, suffused towards the ends of the petals with red, the tips pointed with bright violet-red.

MATCHLESS—Deep crimson, of large size; an early and late bloomer. This I consider one of the best ten Dahlias. Very showy in the garden.

MINA BURGEE—(New.) The best scarlet-red Decorative Dahlia ever introduced. This wonderful Dahlia is a California introduction and is the best of its color. The form is perfect decorative type, the petals being broad and flat; it has a perfectly full center and is a Dahlia that can be grown to an immense size with ordinary treatment. It was very prominent at the Panama-Pacific International Exposition, where it was grown in masses around the Horticultural building. It shows finely under artificial light and for cutting purposes is unsurpassed. I was fortunate in securing a stock of the variety, and can highly recommend it to my customers.

MRS. J. GARDNER CASSATT—A new rose-pink Dahlia that has attracted a great attention. The flowers are of immense size. Said by many to be the finest of all decorative Dahlias.

MRS. CHARLES SEYBOLD—One of the freest flowering of all Dahlias. A cadmium-red, an intermingling of red and orange. Very showy.

SOUVENIR DE GUSTAVE DOAZON—This is the largest of all Dahlias. A lovely shade of orange-red. A veritable giant among flowers.

WILLIAM AGNEW—Intense glittering crimson-scarlet, of large size, and gracefully recurving form. The most popular standard red.

ZULU—The blackest of all Dahlias.
SHOW AND FANCY DAHLIAS

These are the old-fashioned Dahlias of our mothers' gardens. Perfect in shape and outline. Except where noted, 25 cents each; three for 60 cents; the entire set of nine Show or Fancy Dahlias, costing $2.25, for $2.00.

PEONY-FLOWERED DAHLIAS

A new family of Dahlias originating in Holland. The artistic flowers are very large and are best compared to the semi-double Peonies in form. The gayest of all Dahlias for coloring. The three Peony-flowered Dahlias, costing $1.50, for only $1.00.

DR. PEARY—Dark mahogany, shaded velvety-crimson. Award of merit. 35 cents.

GEISHA—The pride of the Peony-flowered Dahlias. This most sensational variety is the showiest and most attractive of this type in existence. The wonderful flowers are renowned for their excellent qualities; being exceptionally beautiful in color, perfect in form, grand in appearance and immense in size. The color of this acquisition is remarkable and attracts everybody's attention. It is a superb combination of brilliant scarlet and gold, with an exquisite ring of rich, clear yellow at the center. Occasionally the first flower comes fully double, but all that is, costing, if ordered at a golden center, which combines to make this flower the most charming. Its form is very original, consisting of peculiarly twisted and curled petals. The effect of these phenomenal flowers is most pleasing, giving this variety the supreme place as the showiest Dahlia in existence. 65 cents.

SHERLOCK HOLMES—(New.) A lovely shade of mauve; this is known as the Blue Dahlia. 35 cents.

CENTURY DAHLIAS

This is an entirely new race of Single Dahlias. I consider today that the new Century Dahlias occupy first place where beauty of coloring and artistic effect is desired. Owing to their immense size, long stems, graceful carriage, combined with their purity of color, or the blendings of colors, shades and tints, they entirely outclass all other Dahlias for cut flowers. Keep every variety when cut in a separate vase. Price, except where noted, 20 cents each; four Century Dahlias, costing 80 cents, for 65 cents.

HARDY DECIDUOUS SHRUBS

The Ever-Blooming Butterfly Bush
(Buddleja Variabilis Maganaica)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties, and this one was among the very first to be observed carefully for a season and was charmed with its beauty, ease of culture and free-flowing habit. The name “Butterfly Bush” was applied to it because it seems to attract butterflies in large numbers. Particularly I notice that it is not alone the common little yellow flowers of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to bloom in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which I mean that it will die down to the ground, and while perfectly hardy, I recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce healthy, strong growth. This shrub is very desirable as an individual specimen on the lawn and in the garden, or placed promiscuously in the shrubbery border. Fine plants, 90 cents each; three for 50 cents.

Buxus

Ornamental Box—Sempervirens

Useful for edging and bordering walks, etc. A handsome little leaved shrub. This is not as dwarf as the Sempervirens Nana, but I find it so much more vigorous and hardy that I advise planting this and trimming to height required, 10 cents each; $1.00 per dozen. By express, purchaser to pay express, $5.00 per hundred.

Calycanthus Floridus

(Carolina Allspice, or Sweet-Scented Shrub.) A most fragrant shrub. The wood-scented flowers of a rare chocolate color, having a peculiar agreeable odor that is very penetrating. They blossom in June and at intervals afterwards. Fine plants, 20 cents each; strong 2-year-old plants, 50 cents.

It makes a perfectly round, symmetrical bush that is covered from June to August with handsome large pure white flowers. Be sure to plant this new hardy shrub; it will please you greatly.

Young plants, 15 cents; 2-year plants, 40 cents.

Hydrangea Paniculata Grandiflora

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season’s growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a good, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation.

Young plants, 20 cents; strong flowering plants, for immediate effect, 2 years old, 40 cents.

NOTE—The last two named Philadelphus are away ahead of the old varieties. Being dwarf, they are superb for hedge planting.

Syringa or Lilac
Well-known beautiful shrubs, indispensable in every collection. It is doubtful if anything in the whole range of flowering, is more perfect in all its attributes than the short-lived Lilacs. The Grandiflora, as the name signifies, is the largest of all Lilac groups, having flowers of a size exceeding the diameter of a shilling. These Lilacs have a great deal of beauty in their coloring, and are more numerous in the market than any other garden flower. They are among the first shrubs to bloom, and last through the entire season. They make large, beautiful masses of bloom. Some of the varieties are covered with flowers for weeks, while others are very profuse. Many of the Lilacs are unscented, others have the sweetest fragrance. Many varieties have double flowers.

These Lilacs bloom in May, June, and July. The Lilacs bloom in May, June, and July. Some of the varieties are covered with flowers for weeks, while others are very profuse. Many of the Lilacs are unscented, others have the sweetest fragrance. Many varieties have double flowers.

Ligustrum—Privet
AMOOR RIVER PRIVET (Amurenese)—This is a very graceful plant; requires little trimming. The leaf is small and rounded, plant branching, has not the sturdy, formal form that the California Privet has. DAISY COLLECTION

No flowers are so graceful for cut-flower work as those of the Daisy form. In the group named below are my own superb Alaska, or Shasta Daisy, and two from South Africa—Aristolochis Grandis, and the Dimorphotheca hybrids; the latter two, so splendid and so little known, are as magnificent as the well-known Shasta Daisy.

If you are perhaps aware, all the plants we know as Daisies belong to the Chrysanthemum family, widely scattered but tolerably distinct family. I have added others, that do not belong to the Daisy tribe adding them for their color and flat-petaled form, their long stems and grace; these are the Cosmos, Galliardia, and Coreopsis.

I grow all these flowers in my own garden, and because I can always gather a vase of graceful, clean-toned flowers for my table, it occurred to me that others might like to know of these for their own gardens so it is with pleasure I offer this list for your consideration.

Agatha Coelestis
Exquisite sky-blue; requires a sheltered position, temperate, but will bloom all winter if lifted and potted in the fall; not so long-stemmed as the other Daisies, but chosen for its delightful color. Pkt. 5 cents.

Anthemis Kelwayi
Golden Marguerite. Deep golden; blooms from midsummer until frost; perfectly hardy. Pkt. 5 cents.

Aristolochis Grandis
South African Daisy. Blooms very large; petals bluish-white above, pure lavender under side. Half hardy annual; one or two plants will supply hundreds of blooms. Flowers until hard freezing. Pkt. 5 cents.

Coreopsis Grandiflora
Clear, pure yellow; blooms early, and if cut back will give scattered blooms all season. Pkt. 5 cents.

Cosmos—Giant-Flowered Hybrids
There are two varieties of Cosmos—the tall late blooming, and the semi-flowered. The tall varieties have from two to three feet in height, the semi-flowered from one to two feet. Both vary in height and form.

Cosmos—Tall, late flowering. Pkt. 5 cents.
Cosmos—Early, semi-dwarf hybrids. Pkt. 5 cents.

Daisy, Alaska
This is the true Shasta Daisy, the Burbank hybrids, than which no finer can be bought. Hardy as an oak, grows finer each year. I have had them four inches in diameter with stems three feet long. Petals rich, heavy, blooms sometimes come semi-double, sometimes with exquisitely quilled edges. Pkt. 15 cents.

Dimorphotheca Aurantiaca Hybrids
This is declared to be the greatest acquisition to the cut-flower flora and to the garden made within the past thirty years. If the weather is not too severe, the blooms are late; if cold weather occurs; will bloom all winter in the house if little early; are winter bloomers in Southern California and are all-round garden flowers and must be grown for that purpose. Colors range from orange through yellow, salmon, pink, white and bluish-white; flower three to four inches across. Pkt. 5 cents.

Gallardia Grandiflora
The well-known hardy perennial. One of the stand bys of the garden and for cut-flower work. Large flowers of rich mahogany-red zoned with yellow and lighter red. Try them in your brown Japanese bas ket. Pkt. 5 cents.

Pyrethrums
All the Pyrethrums are so valuable in their color ing that only mixed seed may be offered. Bloom from mid-May to late July. Colors, pink, white, pink, red, yellow. They bloom in unbelievable masses are fine for cutting and the showiest plant for the gar den I know of. True Daisies. Pkt. 5 cents.
